

Medicine Manufacturer Chooses Stonhard for ESD Protection

Products Used: Stonshield® ESD
Application Area: Processing Room

PROBLEM

A prominent consumer healthcare company in Pennsylvania was experiencing issues with static control in the processing room of its medicine manufacturing facility. If left unaddressed, electro-static discharge (ESD) can cause mayhem in pharmaceutical facilities including issues with quality control, worker safety, and regulatory compliance. Project planners contacted Stonhard for an ESD flooring solution for the 1,200 sq. ft. space.

SOLUTION

Stonhard offers several flooring products designed to mitigate static discharge. For this project, Stonshield ESD, a textured, conductive epoxy floor was the ideal solution.

During the installation process, crews applied the quartz aggregate by hand for a decorative touch that also contributes to the slip resistance of the surface. The combination of Stonshield ESD with an ESD undercoat produced a floor that delighted facility managers with its absolute control over static discharge designed to protect sensitive equipment for years to come.

DESIGN ELEMENTS

Brightly-colored quartz aggregate
Color: Ash

OUR CERTIFICATIONS & MEMBERSHIPS

Stonhard is a member of the U.S. Green Building Council and is on the Manufacturer Advisory Panel for the HPD Collaborative. Stonhard carries an ISO 9001 quality system certification.

THE STONHARD DIFFERENCE

Stonhard is the unprecedented world leader in manufacturing and installing high-performance seamless, resinous floor, wall, and lining systems. With more than a century of experience, Stonhard provides its customers with a single-source warranty covering both products and installation.
